THE ALL-NEW TOYOTA
COASTER

MOVING

**MORE PEOPLE
MORE COMFORTABLY
MORE OFTEN**

INTRODUCING THE ALL-NEW TOYOTA COASTER 23-SEATER BUS.

From its inception in 1969 - followed by second and third-generation models - the newer, bigger, sleeker and better fourth-generation model will now for the very first time be sold in South Africa. It's time to get more space, value and people... moving.

The Coaster finds itself in the midi-bus category, making it bigger than a shuttle or your conventional mini-bus taxi. It's built to move large groups of people comfortably, whether it be school or tour groups. Passengers will enjoy more seating, space and utility while experiencing a ride that offers both comfort and convenience on the road.

MODEL SHOWN: 4.0D 5MT LWB

MORE EXTERIOR

**SLEEK AND CONTEMPORARY,
THE COASTER HAS BEEN DESIGNED
TO EXPRESS BOTH A RIGID BODY
STRUCTURE AND AN EXPANSIVE CABIN.**

The Coaster boasts a sleek and modern design. A bold line divides the exterior into a lower and upper body, with ubiquitous decals that are familiar to all South Africans, as well as luminous decals all around the vehicle.

The upper body has a modern and spacious cabin design, while the lower body accentuates the area around the 17.5" steel wheels with front and rear mudguards. Wide window frames, including the windshield and rear windows, allow for optimal visibility for all passengers, and large side mirrors support the driver's visibility.

At its sliding door, the Coaster has an entrance step made for easy access. It also features colour-coded front and rear bumpers accentuated by halogen headlamps with headlamp levelling.

MORE INTERIOR

Inside, the cabin area offers more comfort and space. Passengers can relax in large seats, with air-conditioning vents and heating from above. The 23-seating configuration (donned with grey PVC floor and seat trim) ensures maximum seating capacity without compromising individual passenger comfort. Passengers and drivers alike can enjoy the audio system with 4 speakers, CD, auxiliary input and USB.

All new Toyota vehicles now come fitted standard with a telematics device that opens up a whole new world of connected features. Upon dealer activation and registration to the MyToyota App, an array of smart connectivity, safety, and convenience features are enabled through your smartphone. The MyToyota App gives you more control of your driving experience and by giving you access to a range of never-seen-before personalised offerings and real-time, customisable vehicle features, including on-board Wi-Fi**, roadside assistance, licence renewal and more.

The cockpit allows the driver to focus purely on driving, with a widened windshield to expand the field of view. Switches and storage compartments are optimally placed within easy reach, to further promote a safer and more tranquil voyage.

**15GB Free data once-off upon activation.
Ts & Cs Apply. Wi-Fi available in South Africa only.

MORE STORAGE

**THERE ARE A NUMBER OF FUNCTIONAL
STORAGE COMPARTMENTS IN BOTH THE
COCKPIT AND THE CABIN AREA.**

The luggage bay has been redesigned to optimise space and provide passengers with plenty of room to neatly stow away bags overhead, to avoid keeping baggage on the floor.

MODEL SHOWN: 4.0D 5MT LWB

MORE CAPABILITY

The Coaster 4.0_L boasts a diesel, common rail engine and a Variable Nozzle Turbo (VNT) for lower emissions, uncompromised power and fuel efficiency. Enjoy power of 100 kW @ 3 000 r/min and torque of 353 Nm @ 1 600 r/min in a 5-speed manual transmission for a truly competitive drive. And appreciate the power steering and a turning circle of 7.2 m for easy manoeuvring.

The Coaster's body structure has been optimally designed to achieve a high level of rigidity, but this benefit is not at the sacrifice of the ride comfort.

The front has been fitted with a double-wishbone suspension, and the rear is fitted with a leaf spring suspension. And by giving greater control to the driver, this advanced suspension keeps the journey smooth and passengers happy.

MODEL SHOWN: 4.0D 5MT LWB

MORE SAFETY

3-Point ELR Seatbelts are available on all seats to promote peace of mind for everyone on board. And driver and front passenger airbags are standard. There are emergency exits all-round and a speed limiter at 100 km keeping the driver in control at all times, and the passengers safe.

Anti-lock Braking System (ABS) helps to keep the driver in control and bring the Coaster to a stop, in time and safely.

Brake-Assist (BA) is the pre-emptive identification of an emergency braking situation through which additional braking force is automatically applied to reduce the braking distance.

Electronic Brake-force Distribution (EBD) is a further evolution of ABS, individually distributing braking force to each corner to allow for variances in weight distribution and tyre grip under braking, to increase stability, stopping distance and vehicle control.

COASTER SPECIFICATIONS

	4.0D 5MT LWB
Engine and Drivetrain	
Maximum Power (kW @ r/min)	100 @ 3000
