

GR YARiS

WE RACE
YOU WIN

A dedicated chassis with tuned suspension, a high-revving turbocharged engine, driver-adjustable GR-FOUR permanent all-wheel-drive, and a choice between a short-throw six-speed manual gearbox or an eight-speed automatic transmission model, combined with lightweight construction and aerodynamically efficient styling, captures the essence of performance in the Gazoo Racing Yaris – and stirs emotion in your heart.

THE GR YARIS RALLY BOASTS A 1.6ℓ TURBOCHARGED ENGINE WITH IMPRESSIVE SAFETY, STYLING AND CONVENIENCE FEATURES.

When you see a GR badge, you know you're about to experience something exhilarating. Something mind-blowing. White knuckling. Because when you see a GR badge, you see Passion. Power. Pedigree – that's the Toyota Gazoo Racing spirit.

And now comes the white-hot Gazoo Racing Yaris; the ultimate performance hatch with speed in its blood and DNA from its World Rally Championship-winning sibling.

Specially developed by Gazoo Racing, Toyota's performance division, the rally-to-road Gazoo Racing Yaris incorporates motorsport-derived engineering and performance to personify the thrill of on-the-limit driving pleasure.

INSPIRED BY

GR TOYOTA GAZOO Racing

MODEL SHOWN: GR YARIS RALLY

ENGINE AND *PERFORMANCE*

Introducing one of the most powerful production 3-cylinder engines in the world. At Gazoo Racing, we believe that racing improves the breed. That's why Gazoo Racing-enhanced road vehicles like the GR Yaris Rally personify the achievements of Toyota's victories at some of the world's most gruelling motorsport events, such as the Dakar Rally, the 24 hours of Le Mans and the World Rally Championship.

Appropriately, the GR Yaris Rally has been designed from the ground up to deliver extreme performance. Its compact and lightweight, 1.6ℓ, 3-cylinder, DOHC 12-valve engine incorporates competition-honed technologies such as a single-scroll ball bearing turbocharger, multi-oil jet piston cooling, a part-machined intake port and a large diameter exhaust.

Maximum power output is rated at 210 kW @ 6 500 r/min and peak torque of 390 Nm @ 4300–4400 making it the most powerful 3-cylinder production engine in the world; and bestowing the GR Yaris Rally with a power-to-weight ratio of 156 kW/tonne.

The output and torque values shown are reference figures based on internal testing conducted with 95 RON fuel. Actual performance may vary depending on operating conditions.

MODEL SHOWN: GR YARIS RALLY

ENGINE AND *PERFORMANCE*

THE MOST POWERFUL PRODUCTION 3-CYLINDER ENGINE IN THE WORLD

Harnessing such prodigious power is a six-speed manual gearbox mated to a new GR-FOUR permanent all-wheel-drive system, with the added option of an eight-speed automatic transmission model for those seeking a different driving experience. For ultra-smooth downshifts, the transmission features Intelligent Manual Transmission with selectable automatic rev-matching. The all-wheel-drive system is configured to deliver maximum accelerative traction through optimal torque distribution to all four wheels, while simultaneously remaining simple and lightweight.

Torque distribution between the front and rear axles is managed by a high-response centre coupling, while two limited-slip Torsen differentials do the same for the split between the left-side and right-side wheels. This ensures a connected but natural driving feel and superlative adhesion for all road conditions. As a result, the GR Yaris Rally accelerates from standstill to 100 km/h in just 5.5 seconds and reaches a top speed of 230 km/h.

Handling excellence and on-the-limit control is guaranteed by Gazoo Racing-tuned MacPherson strut suspension in front, complemented by double wishbone at the back.

MODEL SHOWN: GR YARIS RALLY

ENGINE AND *PERFORMANCE*

For heightened control and dynamic adaptability during ultra-high performance driving – or the driver's mood – the GR Yaris Rally's all-wheel drive can be adjusted through the use of the 4WD Mode Selector switch. Each setting automatically adjusts the torque balance in accordance with driver inputs, vehicle behaviour and dynamic requirements of the road or track.

In Normal mode, a relaxed drive is enabled through a front/rear torque distribution ratio of 60:40. In Sport mode, the front /rear torque bias increases to 70:30 to increase aft-biased agility and playfulness. Finally, for an intoxicating combination of grip, control and superlative dynamic ability as demanded by high-speed curve-carving or circuit driving, Track mode sets the front/rear torque balance as 50:50.

For ultimate tractive ability, the GR Yaris Rally is fitted with a rear limited-slip differential. Born from the World Rally Championship and built for you, the Gazoo Racing Yaris combines vivid dexterity with visceral engagement: formula won.

MODEL SHOWN: GR YARIS RALLY

AGGRESSIVE LOOKS

Gazoo Racing's enhancements of the GR Yaris Rally extend far beyond its high-performance mechanical underpinnings. Its ultra-athleticism is additionally derived from its focused design and the advanced manufacturing techniques applied; such as an aerodynamic GR lip spoiler, a larger GR rear spoiler, and aerodynamic rear bumper. The use of a high rigidity, low-weight Carbon Fibre Reinforced Polymer (CFRP) roof, which, when measured against non-GR Yaris Rally models, has been lowered by 91 mm. This reduction in aerodynamic resistance and mass by using aluminium for the bonnet with an air vent, doors, and rear hatch, further assists in increased overall performance. To protect the underside of your GR Yaris it is now also equipped with a full floor under cover.

Viewed from the side, the GR Yaris Rally's sleekly slung roof – painted in black; frameless doors and three-door body combine to create a muscular, coupé-like silhouette.

The GR Yaris Rally boasts 10-spoke forged alloy wheels, shod with high-performance tyres. It is further distinguishable through the fitment of red, GR-badged brake calliper, front and rear fender liners with air ducts, grooved front brake discs and Michelin Pilot Sport 4 tyres.

The fog lamps, daytime running lights and headlights are all LED-powered; the latter of which include an Auto High Beam function. Auto High Beam automatically dims the main headlight beams upon sensing an approaching vehicle ahead and switches back to main beam as soon it is safe to do so. At the side, the mirrors are electrically adjustable and foldable, as well as heated to ensure a clear view at all times.

RACE THE ROAD; RAISE YOUR PULSE.

MODEL SHOWN: GR YARIS RALLY

STYLED *TO WIN*

The Gazoo Racing Yaris may be wired with DNA designed to master the extremities of the World Rally Championship, but that doesn't mean it has to compromise on interior luxury.

In keeping with its motorsport roots, a GR-badged 3-spoke genuine GR leather steering wheel, matching leather shift lever knob and drilled aluminium sports pedals ensure a maximum tactile interface between man and machine.

This is enhanced by specially designed GR-badged, body-hugging sport seats, covered in suede with synthetic leather.

MyTOYOTA GET CONNECTED WITH

IN-CAR WI-FI, ROADSIDE ASSISTANCE AND MUCH MORE

All Toyota vehicles can now be connected to the MyToyota App on your mobile phone, giving you more control of your driving experience and opening up a whole new world of personalised offerings and customisable features, so that you can enjoy:

IN-CAR WI-FI*
Connect to Wi-Fi

GPS LOCATOR
Always know your vehicle's GPS location

LOGBOOK
Have access to a digital logbook

DRIVER NOTIFICATIONS
Important reminders like licence renewal

BATTERY HEALTH CHECK
Check your battery health

SERVICE BOOKING
Manage your services

ROADSIDE ASSISTANCE
Get real-time roadside assistance

DRIVER RATING
Receive a driver rating

FLEET MANAGEMENT
Monitor your fleet

LICENCE RENEWAL
Renew from the App

AND MORE - The above features are not all; there are loads of other features available to further enhance driver and guest safety, convenience and comfort; and plenty more to come to make your drive experience better and better with every kilometre.

DOWNLOAD THE MyTOYOTA APP AND GET CONNECTED TODAY

KEEP YOUR TOYOTA GENUINE KEEP YOUR TOYOTA

Toyota vehicles are known for their Quality, Durability and Reliability. Keeping your Toyota Genuine means no compromises in terms of safety, performance and resale value. The range of Genuine Products and Approved Services will ensure complete peace of mind throughout the ownership journey and beyond. For more information on how to Keep Your Toyota Genuine visit www.toyota.co.za/owners/genuine-parts

TOYOTA GENUINE PRODUCTS

For guaranteed fit and function, **Genuine Parts** are essential in maintaining the safety and reliability of your vehicle. They also comply with all safety, regulatory and environmental requirements, making it the obvious choice. The same exacting precision applies to Toyota Accessories, developed by engineers with extensive knowledge on vehicle integration - you can enhance the appeal and functionality of your GR Yaris without compromising its safety features or warranty. Warranties are about peace of mind, and the Genuine Unlimited Warranty is designed to provide superior cover (up to 10 years, unlimited mileage) and a seamless claims process thanks to full integration with Toyota systems. The Genuine Extended Service Plan also enjoys exclusive approval by Toyota SA and provides flexible extension options up to 10 years or 300 000 km to suit your period of ownership. Paying today's rates for tomorrow's maintenance is a sensible way to protect the resale value of your GR Yaris by means of a full service history.

TOYOTA APPROVED SERVICES

Specialised vehicle maintenance requires first-class facilities, advanced equipment and expert knowledge. **Toyota Quality Service and Value Service** not only promise accurate diagnosis and repair, but also a philosophy of building trust through a genuine concern for the needs of our customers. To complement the extensive network of Toyota dealers, we have a vast number of Accredited Body and Paint Repairers, selected on stringent criteria to ensure outstanding workmanship and customer service. You can maintain your vehicle's pristine condition without compromising its warranty thanks to the exclusive use of Genuine Parts by our Accredited Repairers. Offering 24-hour access to a full complement of assistance and recovery benefits, Toyota Roadside Assistance provides the peace of mind that competent support is only a phone call away.

TOYOTA GENUINE MEANS

✓ UNCOMPROMISED SAFETY ✓ GUARANTEED QUALITY ✓ PEACE OF MIND

TOYOTA ENVIRONMENTAL CHALLENGE 2050

At Toyota, creating technologically advanced vehicles isn't our only priority; we're committed to lowering our environmental impact throughout our entire production process. How? By setting ourselves six challenges that will see us reach a truly world-changing goal: a positive environmental impact by 2050.

ZERO $C0_2$

CHALLENGE 1

NEW VEHICLE ZERO CO_2 EMISSIONS CHALLENGE

By owning a Toyota you would be contributing to the reduction of vehicle CO_2 emissions by 90% in 2050 as opposed to 2010. You will help us promote the development of next-generation vehicles and further accelerate the spread of these vehicles.

ZERO $C0_2$

CHALLENGE 2

LIFE CYCLE ZERO CO_2 EMISSIONS CHALLENGE

You are lending a helping hand to Toyota's efforts to reduce to zero not only CO_2 emissions produced in travelling and manufacturing, but all CO_2 emissions including the process of materials production, disposal and recycling of vehicles.

ZERO $C0_2$

CHALLENGE 3

PLANT ZERO CO_2 EMISSIONS CHALLENGE

You uphold the two main pillars of our strategy to achieve zero CO_2 emissions at our plants which are:
1. Developing and introducing low-CO_2 technologies with ongoing kaizen.
2. Adopting renewable energy sources and utilizing hydrogen energy.

TOYOTA IS SERIOUS ABOUT COMBATING THE PROBLEMS ASSOCIATED WITH WASTE TYRES IN THE COUNTRY AND HAS THEREFORE TAKEN UP ITS PRODUCER RESPONSIBILITY AS DEFINED BY THE WASTE MANAGEMENT ACT OF 2008. WASTE TYRE REGISTRATION NUMBER: TPREG0031GAU

The message is clear – Toyota Motor Corporation (TMC) wholeheartedly supports the Paris Agreement and accepts the challenge to achieve carbon neutrality by 2050. The Paris Agreement is a legally-binding international treaty on climate change and is aimed at reducing the emission of gases that contribute to global warming. While this treaty was only adopted in 2015, Toyota has been innovating and investing in technology to reduce emissions and achieve carbon neutrality for well over 30 years. Toyota has also led the way with more electrified vehicles on the road than any other automaker.

TOWARDS CARBON NEUTRAL

THE TOYOTA GR YARIS HAS BEEN MANUFACTURED TO MINIMISE ITS CARBON FOOTPRINT.

Guided by the goals of the Toyota Environmental Challenge 2050, as little impact as possible is made on the environment during each step of the process. From design to manufacturing, to end-of-life recycling programmes, our planet always comes first. This is because the ultimate long-term goal for Toyota is to make all our vehicles as environmentally friendly as possible. With this in mind, the entire GR Yaris range has been designed to have very low CO_2 emissions.

CHALLENGE 4

CHALLENGE OF MINIMISING AND OPTIMISING WATER USAGE

In automobile manufacturing, we use water in painting, forging and other processes. Therefore, even a small reduction of its impact on the water environments is important. We have two measures to achieve this, comprehensive reduction of the amount of water used and comprehensive purification of the water and returning it to the earth.

CHALLENGE 5

CHALLENGE OF ESTABLISHING A RECYCLING-BASED SOCIETY AND SYSTEMS

You have contributed to our 40 years on the challenge of resource recycling. Going forward, by rolling out to the world the technology and systems evolved in Japan, we will all continue working on the challenge of establishing a recycling-based society.

CHALLENGE 6

CHALLENGE OF ESTABLISHING A FUTURE SOCIETY IN HARMONY WITH NATURE

Here at Toyota we have engaged in planting trees at our plants and environmental conservation activities in our surrounding areas. To establish a society where humans and nature coexist in harmony, we are promoting several activities to connect regions, the world and the future.
